Sample name: PIEDINO INTEGRATO TECH "A" REG. 18 COD. 3505003000

Compressive strength - Catas Procedure

Sample description declared: PIEDINO INTEGRATO TECH "A" REG. 18 COD. 3505003000

Fixing system type: By screws on the edges of the metal block
Test conditions: 20±5°C
Test equipment: Instron dynamometer mod. 5985
Test speed: 2 mm/min
Load applicator: Steel plate Ø150 mm

- Test scheme -

Test procedure:

Samples were prepared by the customer (see test scheme), the assembled system is compressed between two rigid plates until the maximum load is reached or any failure occurs.

Test results:

Sample n°	Foot adjustment mm	Maximum load N	Remarks
1	18	4.057	Deformations of steel components were observed
2	18	3.863	Deformations of steel components were observed
Mean value		3.960	
Standard deviation		137	

Note:

- Sampling and specimens preparation were carried out by the customer.
- Chemical analysis of the tested material has not been carried out.

This test report is part of a PDF file digitally signed by Paolo Tirelli.

The deputy director
Dr. Paolo Tirelli

The sample name and, when relevant, its description, are given by the orderer, and CATAS does not assume responsibility on this matter. This test report relates to the sample submitted for the test and no others. Additions, deletions or alterations are not permitted. This test report must always be reproduced in its entirety. Unless otherwise required by standards and technical specifications or agreed with the customer, any declarations of conformity made by CATAS are based on the comparison between results and reference values, where the confidence intervals of the measures are not taken into account. Unless otherwise stated, sampling is made by the customer; in this case the test results are referred to the sample as received.
